IntelliTraq
TRACK YOUR FINANCIAL PULSE

The Only Intelligence Solution Built Exclusively for Pediatrics

1

Get the picture. Fast

Eliminate spreadsheets, data extracts, pivot tables and multiple reports.

Easy to read visualization on mobile, tablet and desktop.

Critical information when and how you need.

2

See it. Understand it.

Visualize your financial data to readily identify opportunities to improve your financial performance.
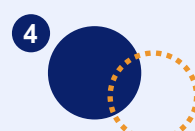

Intuitive guides to help you understand how to address issues in the practice.

3

Interactive charts & graphs.

With a few clicks, you can perform complex calculations, filter data, cross reference and compare results.

Reviewing Key Financial Indicators for your organization is simple with IntelliTraq.

4

Benchmarking

Compare your organization to others from around the country.

With over 3.7 million encounters, you can readily compare your financial performance.

IntelliTraq
TRACK YOUR FINANCIAL PULSE

IntelliTraq works with the following systems (and more):

AdvancedMD · Allscripts · OP Office Practicum · Greenway Health · athenahealth · eClinicalWorks · Epic

Claim Filing Turnaround Time Chart

Claim Filling Turnaround Time
The claim filing turnaround time tracks the date the patient encounter occurred (Date of Service) and the date the claim was filed. The chart shows a percentage for each turnaround day.
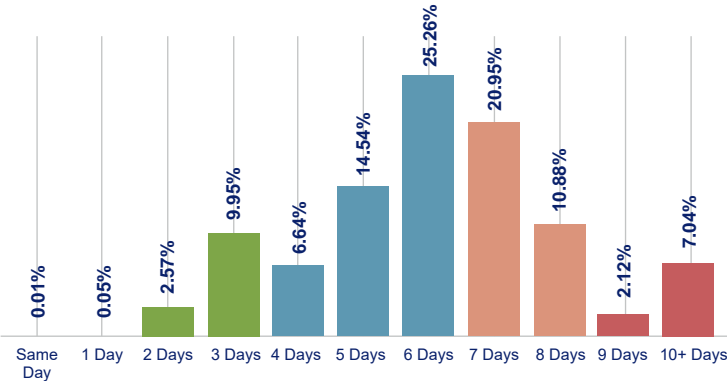

Purpose
- View how long it takes to submit claims.
- Review how quickly (or not) claims are being filed.
- Evaluate the proportion of claims submitted by number of days.
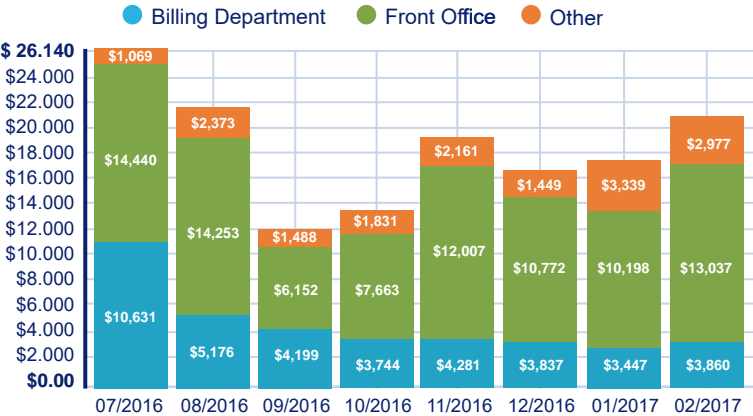

IntelliTraq Insight
Although there are instances when a practice may have good reason to justify extended claim turnaround days, under normal circumstances practices should strive to submit claims no later than 2 days after the date of service.

The implications of a having a large portion of claims greater than 2 days is related to the potential cash flow burdens. To put it in perspective, prolonged filing turnaround time represents work that has been performed, services that have been rendered, vaccines that have been administered, but have yet to enter what is referred to as the "Revenue Cycle".

Turnaround chart:
- Same Day: 0.01%
- 1 Day: 0.05%
- 2 Days: 2.57%
- 3 Days: 9.95%
- 4 Days: 6.64%
- 5 Days: 14.54%
- 6 Days: 25.26%
- 7 Days: 20.95%
- 8 Days: 10.88%
- 9 Days: 2.12%
- 10+ Days: 7.04%

- Save time exporting data from your billing system
- Save time analyzing your data
- Ensure consistent analysis
- Compare with peers

Every hour you spend exporting & crunching data, is less time managing the staff, increasing revenue and ensuring your patients are being cared for.

Stacked bar chart legend: ● Billing Department ● Front Office ● Other

Month	Billing Department	Front Office	Other
